Experience

User Interface Freelancing

March 2022 – Present

Frontend Freelancing

- Created a personal website showcasing a portfolio of frontend projects and UI designs.
- Listened attentively to client requirements and implemented feedback to ensure client satisfaction.
- Delivered high-quality work on time, exceeding client expectations.

Projects

Client Testimonials and Portfolio | *HTML, CSS, Javascript, Figma*

May – 2023

- Received positive reviews for portfolio aesthetics, UI problem-solving, and efficient work.
- Adrian Twarog, with a subscriber base of 300k, praised the colors, text, layout, and pricing plan of the portfolio.
- Toothpaste, with a subscriber base of 400k, commended quick problem resolution with UI and highly recommended services
- Explore my full portfolio at <https://ioanhumphreys.xyz>.

Discord Commission Handler BOT | *Discord.js, MongoDB, API Services, JSON*

June 2023

- Developed a versatile Discord bot serving multiple functions, including moderation, commission management, and community engagement.
- Implemented a unique ordering system, enhancing the bot's functionality and setting it apart from standard bots.
- Showcased adaptability by seamlessly integrating frontend design expertise into Discord bot interfaces, providing clients with comprehensive solutions for their digital needs.

Discord Webhook Tool | *HTML, TailwindCSS, Javascript, JSON, Pikr API*

November 2023

- Implemented a flexible WebhookURL section allowing dynamic addition and deletion of webhook URLs.
- Utilized a clean and user-friendly UI with input boxes, icons, and interactive buttons.
- Integrated functionality to manage and display the Webhook URL with corresponding delete and add buttons.
- Orchestrated an event-driven architecture using 'addEventListener' upon DOMContentLoaded, ensuring seamless execution of intricate functions post-DOM initialization.
- Masterfully configured accordions for avatar, embed, author, content, image, fields, clonedField, and footer sections. Delivered a collapsible user experience with precision.
- Engineered a robust webhook submission mechanism. Thoroughly validated required fields, constructed a JSON payload with meticulous embed processing, and implemented error-aware handling for seamless integration

Technical Skills

Languages: HTML/CSS, Javascript, Discord.js, Lua, MongoDB, TailwindCSS, JSON

Developer Tools: VS Code, Figma, Discord Developer Portal, Roblox Studio

Technologies/Frameworks: Next.js, Vercel Deployer, Windows, VS Code, ChatGPT, GitHub

Leadership / Extracurricular

Unusual Innovations

November 2023 – Present

Founder

Game Studio

- I founded Unusual Innovations on Roblox, recruiting scripters, 3D artists, sound designers, and a music producer.
- Managed to release our first game having over **600,000** impressions, **12,000** clicks and availability on all platforms.
- Led 7+ members to work towards goals that improve and promote community service, skill set and unity.
