Work experience

Turbo – Chat Assistant

Discord.js, Javascript, MongoDB

To enhance my commissioning service and overcome the challenge of a slowdown in providing answers on my own, I developed Turbo, a Discord chat assistant. Turbo assists in streamlining the process by providing efficient and prompt responses. This innovation has significantly improved the overall quality and speed of my commissioning service.

Portfolio

Tailwindcss, Javascript, Next react.js

I utilized **Tailwind CSS** to create a dynamic portfolio that showcases my work and provides additional insights into who I am. This implementation has enabled me to present my projects effectively and share relevant information about my skills and experiences. The portfolio design reflects my attention to detail and commitment to creating visually appealing and informative presentations.

Education

Ysgol Bryngwyn – Comprehensive

Sep 2018 – Jun 2023

Coleg Sir Gar – College

Sep 2023 – Present

Portfolio

Additional info

During the lockdown, I proactively ventured into freelancing and established a diverse client base. Through my dedication and commitment, I consistently delivered exceptional work, which resulted in highly positive reviews from satisfied clients. This freelance experience not only allowed me to showcase my skills and capabilities but also enabled me to generate a reliable and substantial income during that challenging period.

About

I am a hardworking and motivated individual with excellent communication skills. I have a passion for computer science and have spent the last 4+ years teaching myself and creating small projects. I have actively contributed to game creators with over 1.4 million members and have started freelancing to apply and monetize my unique computing skills.
